

CRUISING AT ITS *Super* PUREST *METEOR 650*

ROYAL ENFIELD

ROYALENFIELD.COM

The Super Meteor 650 is the definitive cruiser, engineered using sixty years of cruising experience. Unlike other machines, it doesn't lug around a load of unusable features. It brings with it only what the open road calls for: A proven 648CC parallel twin engine. An ultra-comfortable riding stance. And dollops of torque. It's a motorcycle that has been built on one fundamental belief: that the greatest journeys cannot be limited to hours or kilometres.

650CC PARALLEL TWIN

648CC. 47PS of Power. 52.3 Nm of torque.

At the core of the Super Meteor 650 is our iconic parallel twin engine, which offers seamless gear transitions, strong low-end acceleration and an effortless throttle response.

A new cylinder head mount gives high torsional stiffness, making your riding experience smooth, steady and responsive, at both low and high speeds.

CHASSIS

The Super Meteor 650 sits on an all-new frame that's been sculpted around its twin engine, ensuring nimbleness and ease of handling while adding to its quintessential cruiser form. A tubular spine frame, relaxed riding stance and low center of gravity give you every bit of the solidity and stability you need, whether you're cruising down the highway or navigating a busy street.

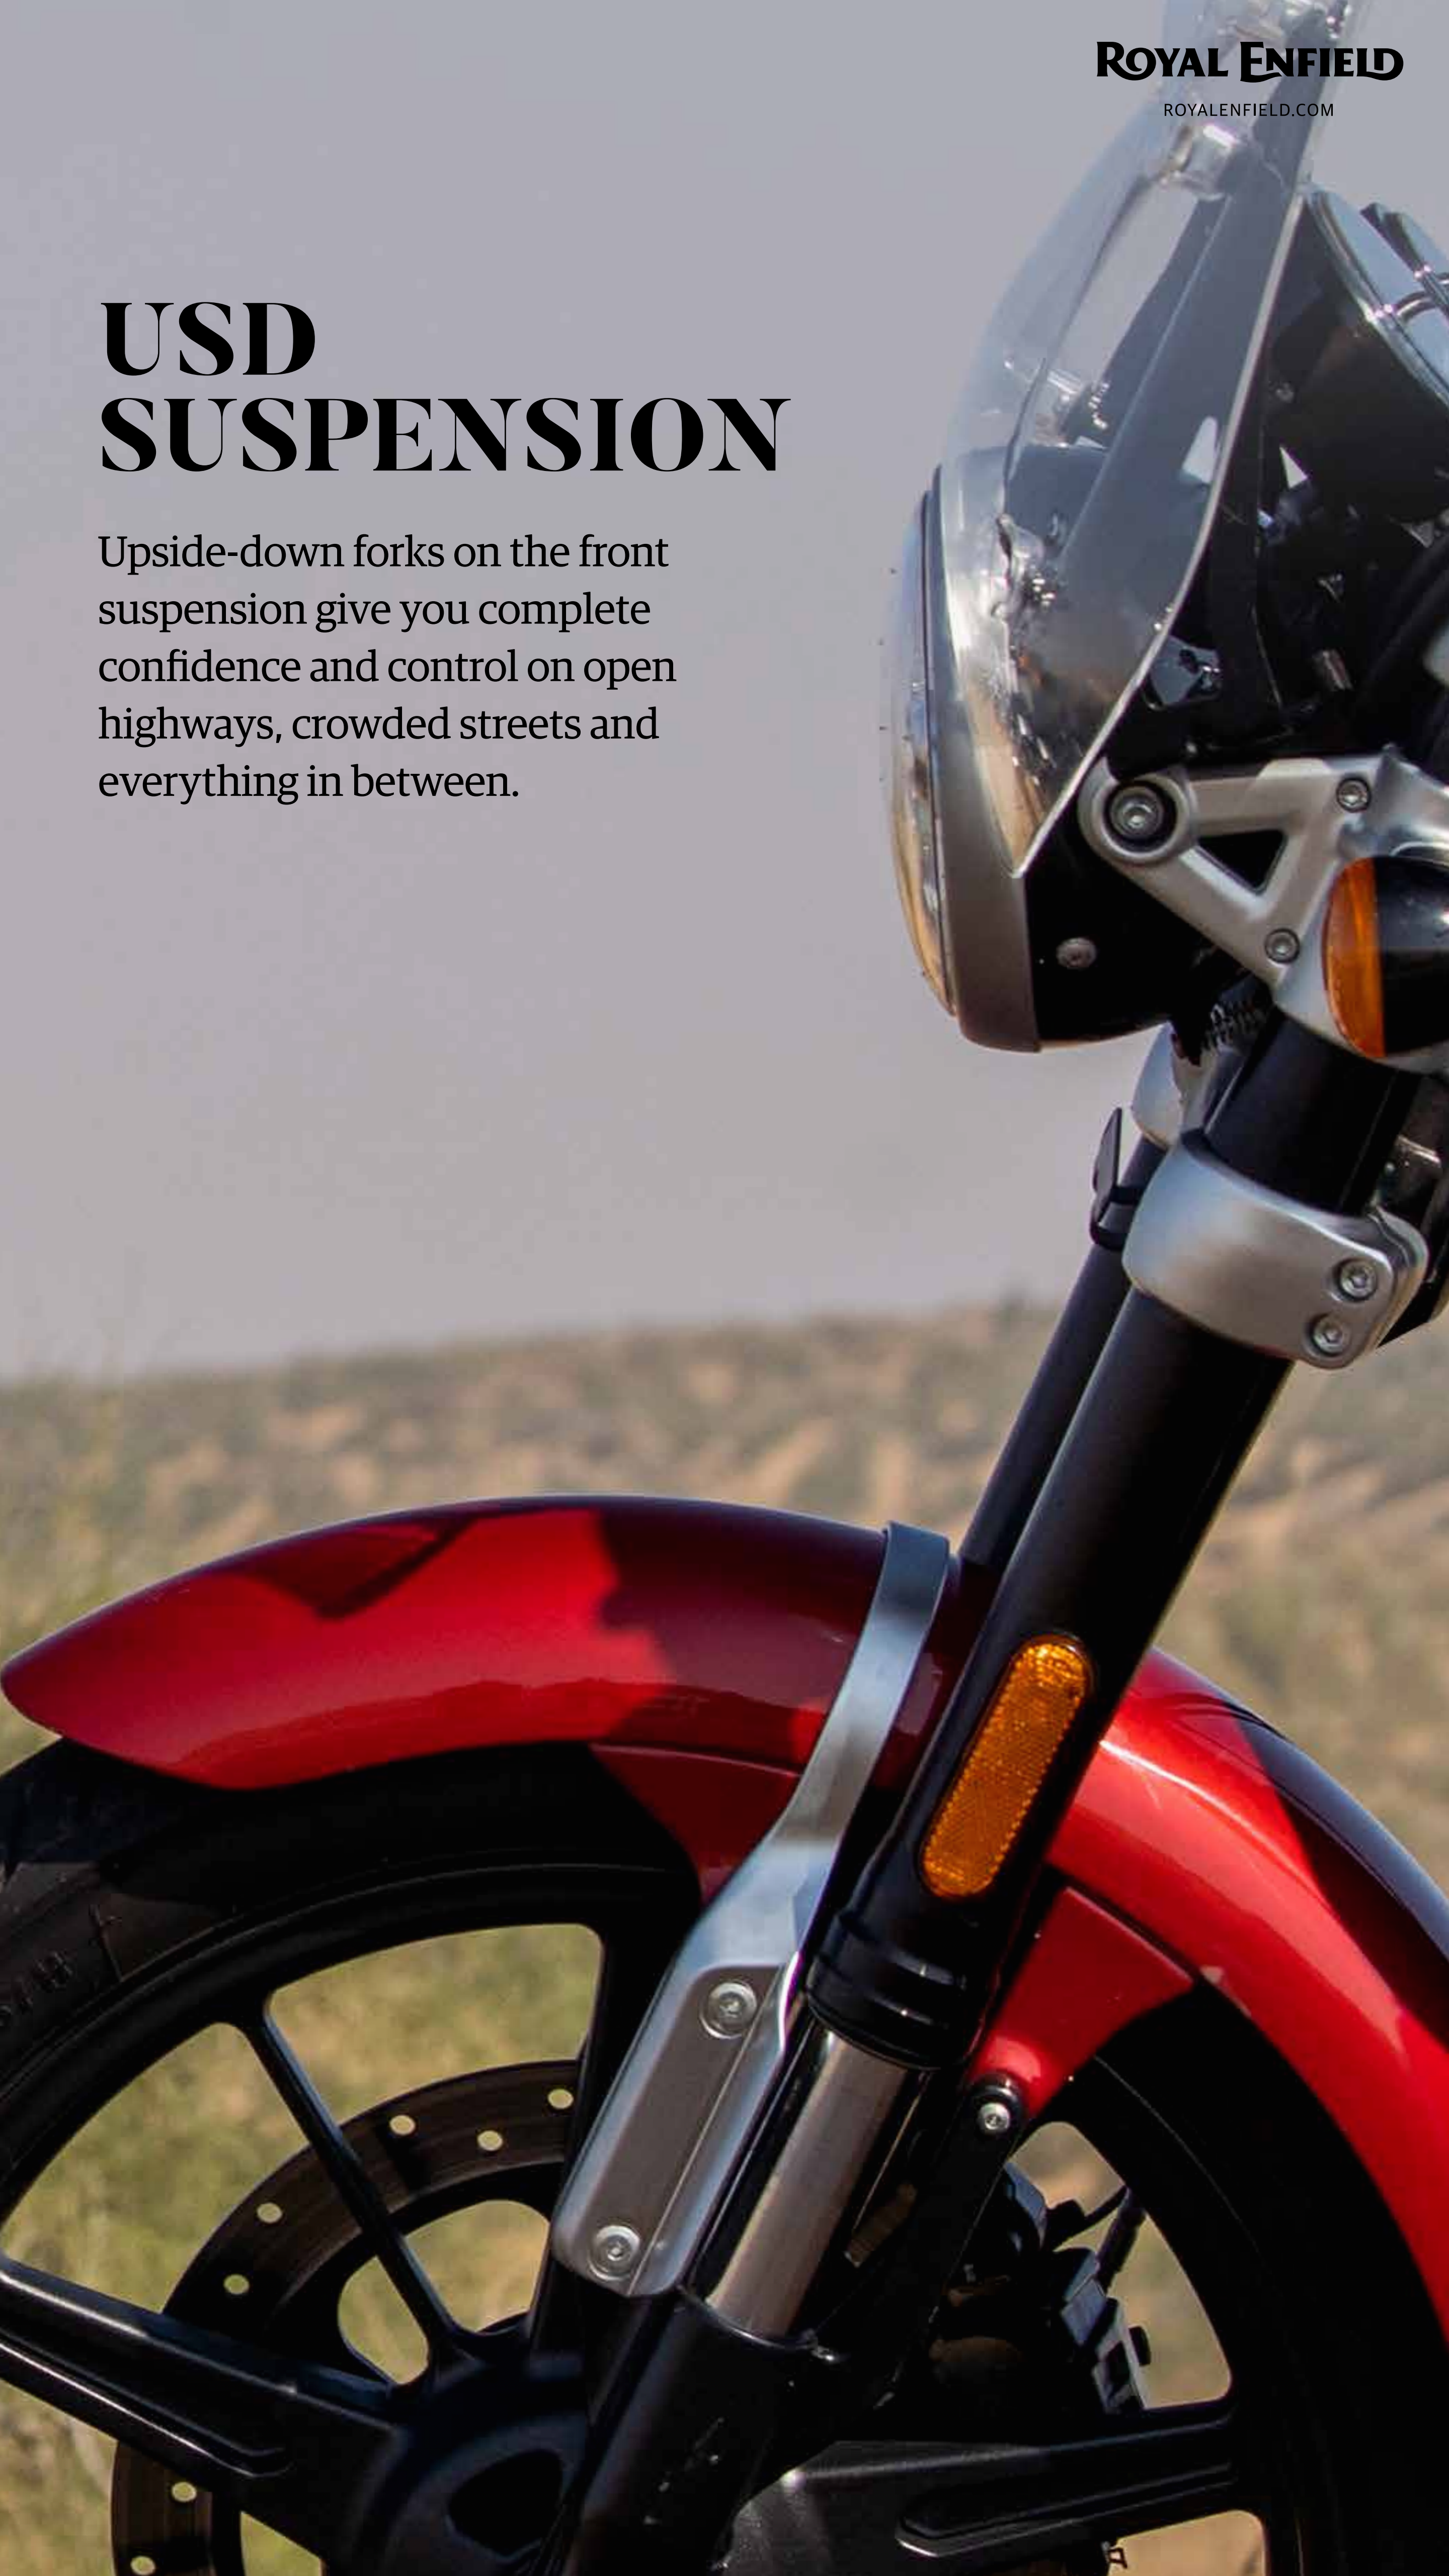

LED HEADLAMPS

An all-new headlamp combines old-school aesthetics with modern LED lights to reduce power usage while increasing visibility, no matter where you're headed.

USD SUSPENSION

Upside-down forks on the front suspension give you complete confidence and control on open highways, crowded streets and everything in between.

LOW SLUNG SEAT

A low-set, wide seat and a laid back riding stance make cruising a comfortable experience, no matter how many kilometers are behind you and how many lie ahead.

SCULPTED FUEL TANK

The spacious, teardrop tank on the Super Meteor 650 can carry up to 15.7 liters of fuel, ensuring that even the longest of rides continues uninterrupted.

Specifications

Engine

Type	Parallel twin, 4 stroke, SOHC, Air-Oil Cooled
Bore x Stroke	78 mm x 67.8 mm
Displacement	648 cc
Compression Ratio	9.5:1
Maximum Power	34.6 kW (47PS) @7250 rpm
Maximum Torque	52.3 Nm @5650 rpm
Ignition System	Electronic Fuel Injection(EFI)
Clutch	Wet, multi-plate
Gearbox	6 Speed constant mesh
Air Cleaner	Paper element
Engine Start	Electric

Chassis & Suspension

Type	Steel Tubular Spine Frame
Front Suspension	43mm Upside Down Telescopic Fork, 120mm travel
Rear Suspension	Twin Shocks, 101mm travel, preload adjustable

Dimensions

Wheelbase	1500 mm
Ground Clearance	135 mm
Length	2260 mm
Width	890 mm (without mirrors)
Height	1155 mm
Seat Height	740 mm
Kerb Weight (without fuel)	241 kg (with 90% fuel & oil)
Fuel Capacity	15.7 litres

Brakes & Tyres

Tyres Front	100/90 - 19 M/C 57H (Tubeless Type)
Tyres Rear	150/80 B16 M/C 71H (Tubeless Type)
Brakes Front	320mm disc, twin piston floating caliper
Brakes Rear	300mm disc, twin piston floating caliper
ABS	Dual Channel
