CRUISING NEVER LOOKED SO GOOD

Cruising fuels the eternal longing to seek and explore, where the rider becomes one with the road and lets it take us where it wants. The Meteor represents that eternal essence of riding, the spirit of the cruise; with classic contours & timeless design cues, it is a thoroughbred yet easy cruiser, ready for the open highway and meeting the challenges of urban commute with equal ease.

CRUISING NEVER FELT SO GOOD

With an enhanced chassis setup, accessible riding position, advanced braking ability, high specification suspension and responsive power delivery, the Meteor 350 is set to light up the world of cruising. Its agile, light handling is a result of hours of testing and development culminating in a new chassis that is stronger, stiffer and more durable without compromising on rider comfort. A 1400mm wheelbase and seat-height of 765mm, makes for an accessible and confident riding position.

AT THE HEART OF IT

At the heart of the Meteor is the J series Air-Oil Cooled, 349cc, SOHC engine with a characteristic long stroke producing smooth tractable power and plenty of bottom-end torque. The electronic fuel injection (EFI) system provides reassuring power delivery right from the start, consistently throughout the rev range which ensures a unique performance. Continuing the legend of the easy singles, the new engine throbs with a beat that is distinctively Royal Enfield.

TRIPPER NAVIGATION

The Meteor 350 features a Tripper™ navigation system, the first-ever in a Royal Enfield. Powered by Google Maps and the Royal Enfield App, that connects smartphones with the motorcycle through Bluetooth. Tripper is a sophisticated navigation solution, rich in features specially developed for motorcyclists, that indicates directions through an intuitive display system. Combined with a host of facilities on the Royal Enfield App, including a USB charging port on the motorcycle.
